

Cyber Futures Program

Align

Connect with our members and facilitate best practice sharing for the betterment of the industry and each other. We promote the development of leadership skills in our members.

Grow

Build programs and resources to attract talent at all levels. The Alliance is committed to increasing diversity and growing career-path awareness, around the globe.

Give

Create and foster a vehicle for our members to support community organizations to address their information security needs.

About Us

The Security Advisor Alliance is a 501(c)3 nonprofit founded and run by industry leading cybersecurity professionals.

Our mission is to unite the cybersecurity community to drive awareness to and diversity within our industry. Our 500+ members across the globe work to identify and address the biggest challenges facing the cybersecurity industry.

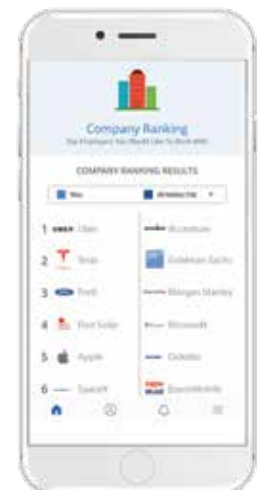

Mentor Students At Scale

THE STUDENT JOURNEY

The Alliance Cyber Futures Program provides students with an interactive mobile-app-based experience that empowers them to test-drive future cybersecurity careers and learn directly from top industry professionals year-round right from their phone.

- ▲ Students utilize self assessments to identify their hard and soft skills as well as what they look for in a career and place of employment.
- ▲ By reverse-engineering our mentors' career path, we give students a glimpse into the life and journey of cybersecurity professionals.
- ▲ Virtual field trips help students build cybersecurity skills through gamified learning.

As an Alliance Virtual Mentor, you are building brand awareness while inspiring and educating future cybersecurity professionals.

Measure Your Impact

MEASURE THE IMPACT OF YOUR BRAND
IN SHAPING STUDENTS CAREER PREFERENCES

Showcase your brand and cybersecurity expertise

Promote your firm as a top company to work for

Receive analytics on the number of students engaging with your company's mentors through our reporting system
